

Princess Ro-me

Baby Genius

by Darlene Showers

Princess Ro-me is no ordinary baby. From the moment she was born in the vibrant African village of Oohbatu, her family knew she was special.

With bright, curious eyes that sparkled like diamonds and a smile that could light up the darkest of nights, she captures the hearts of everyone around her.

Despite her young age, Princess Ro-me has a mind far beyond her years.

While other babies were babbling and crawling, she was already showing signs of incredible intelligence.

She loves to spend hours designing electronic products that help the villagers do their daily tasks.

The villagers are amazed at her every move, whispering about the baby princess, who seems to possess a wisdom that tops even the village elders.

They watch as she plays with the village children. They are happy to see that she enjoys having fun, too!

As Princess Ro-me grew, so did her reputation as a young genius.
